PLANNING, PREPAREDNESS, REMEDIATION, AND RECOVERY

SUPPORTING HOMELAND DEFENSE BEFORE, DURING, AND AFTER 9/11

Weston Solutions, Inc. (WESTON®) has been involved in homeland security since 1996 when it began assisting the federal government in preparing for high profile events, building on a 20-year history of responding to national emergencies. WESTON responded to both the World Trade Center tragedy and the U.S. Postal Service and Senate anthrax attacks, and was the lead environmental contractor for the Space Shuttle Columbia recovery efforts. WESTON is providing homeland security planning, system design/build, and response support across the nation. Through it all we have ensured the timely and appropriate use of proven technologies to accomplish our missions.

WESTON personnel enter the Hart Senate Building during the anthrax cleanup.

▶ PROVEN, DEPLOYED TECHNOLOGIES
