SERVICE SYNOPSIS

The Trusted Integrator for Sustainable Solutions

GEO-CIVIL DESIGN

As a leading environmental and redevelopment firm, Weston Solutions, Inc. (WESTON®) has extensive experience in design, construction, and permitting, as well as nationally recognized expertise in civil and geotechnical engineering. Offering a full range of geo-civil services, WESTON has design and construction centers strategically located across the United States, and has completed projects for a range of industries, federal and state agencies, and municipalities.

Quality management and value engineering are integral parts of WESTON's geo-civil design and construction process. At WESTON, we constantly strive to create value for each project, through innovative technology, cost-effective implementation and delivery, and integration of project management systems.

Our success is based on:

- Forming a team with our client
- Studying and analyzing all available data
- Understanding our client's needs
- Collaborating internally for innovative, alternate designs

Geo-Civil Design Services

Site Expertise

Geotechnical Expertise

Permitting Expertise

Civil Site Work

- Site Development and Layout
- Site Grading
- Site Excavation
- Remediation
- Erosion and Sedimentation Control
- Stormwater Management
- Stormwater Systems
- Riverbank/Shoreline Stabilization

Geotechnical

- Site Investigation
- Slope Stability Evaluation
- Foundation Design
- Geosynthetic Design
- Retaining Structure Design
- Construction Inspection
- Forensic Analysis

Permitting

- Solid Waste
- Hazardous Waste
- Erosion and Sedimentation Control
- Wetland Encroachment
- NPDES
- Stormwater BMPs
- Construction Permits

Geo-Civil Design

Landfill Design

Environmental Plans

Contract Know How

Studies

Waste Services

- Landfill Design, Closure, Expansion, and Overfill
- Impoundment Design and Closure
- CDF Design
- Stabilization Design
- QA/QC Plans
- O&M Plans

Environmental Plans

- Spill Prevention Control and Countermeasure
- Stormwater Pollution Prevention
- Erosion and Sedimentation Control
- Wetland Mitigation
- Health and Safety

Construction

- Specifications and Bidding Documents
- Drawings
- Management
- Inspection
- Cost Estimates

Studies

- Hydrological Analysis
- Hydrology
- Siting
- Hydraulics

The Benefits of Geo-Civil Design and Construction by WESTON

- Timely execution
- Innovation
- Safe performance
- Cost-effectiveness
- Extensive project experience
- Regulatory awareness
- Knowledgeable staff
- Qualified field personnel
- Economic alternatives
