

INDIAN EYES-WESTON Federal Services JV

Native American, Woman-Owned SDB

ABOUT US

The **Indian Eyes-Weston Federal Services (IEWFS) Joint Venture (JV)** was formed through a Small Business Administration (SBA) Mentor-Protégé relationship and is designated as a Native American, Woman-Owned Small Disadvantaged Business. Our team offers exceptional DOE experience; large business capabilities and resource capacity, and the flexibility and utilization credit accessible through a small business partnership.

Indian Eyes, LLC, led by Roxie Schescke, and Weston Solutions, Inc., led by Alan Solow, are well recognized in the DOE community for both their personal and respective firm reputations for delivering high-quality, on-time, and cost-effective solutions. Our clients comprise DOE, all DoD service branches, EPA, other Federal and State agencies, and the private sector. The combined knowledge, technical expertise, full depth of resources, and experienced leadership of Indian Eyes, LLC and Weston Solutions, Inc. delivers services responsively anywhere in the nation.

SERVICES

WATER QUALITY

- Water/Wastewater Facility Design/Construction • Storm Water Management
- Flowback Water Treatment & Reuse • Project Management & Planning

DESIGN & CONSTRUCTION

- Fueling System Optimization • Design-Build • Permitting • Secure Construction • General Contractor
- Subcontracting & Procurement • Schedule & Cost Management • Health & Safety Oversight

FACILITY SUPPORT SERVICES

- Facility/Cyber Hardening • Maintenance & Upgrades • Project Management & Planning
- Installation Access Control • Infrastructure Disaster Response

TRU, LOW-LEVEL, CLASSIFIED, & MIXED WASTE MANAGEMENT OPERATIONS

- Waste Sorting & Packaging - Legacy, Post-Legacy, Classified Items
- Repackage & Ship Contact-Handled (CH) & Remote-Handled (RH) TRU
- Manage Radioactive, Mixed, CH-TRU, RH-TRU, & PCB Waste Operations
- Package Newly-Generated Plutonium Isentropic Compression Experiment (Pu-ICE) & Prepare Generator Knowledge Summary Reports

WASTE MANAGEMENT

- Drilling Waste Management Permitting • Drilling Waste Management • Data/GIS Management Service
- Disaster Response

EQUIPMENT LOGISTICS

- Equipment Rental & Training • Fleet Management Services • Manage Client-Owned Assets
- Provide Rental/Lease Assets • Manage Equipment Operations • Safety & QA/QC
- Technical Assistance • Nationwide Single Point Sourcing

ENVIRONMENTAL REMEDIATION

- Investigation • Hazardous, Toxic, and Radioactive Waste (HTRW) • RAD Packaging
- Munitions & Explosives Clearance • Compliance Planning, Documentation & Monitoring
- Permit/Management Plan Compliance • Emission/Greenhouse Gas (GHG) Testing & Reporting
- Data/GIS Management Services • Time-Critical Clean-up Response

IT & RECORDS MANAGEMENT

- DOE O 200.1 Capable IT Management • Information Technology Infrastructure Library (ITIL) Certified & DOE O 415.1 IT Project Management • DOE O 243.1 & National Air Resources Act (NARA) Compliant Records Management • Nuclear Quality Assurance (NQA-1) and DOE O 414.1 QA

REGULATORY COMPLIANCE

- Develop & Implement CERCLA/RCRA Programs, e.g., Training Programs, Inspection Schedules
- EPA, State Environmental Department, and Clinical Trials Audit and Compliance (CTAC) Audits
- Surveillances for RH-TRU Repackaging

NAICS CODES

562910 – Environmental Remediation
561210 – Facility Support Services
532412 – Construction Equipment

532490 – Commercial & Industrial Machinery
541611 – Records Management
561612 – Security Services

561330 – Professional Staffing Services
237990 – Heavy Civil Engineering Construction

PROJECTS

Trustee, West Chicago Environmental Response Trust (WCERT), IL

Weston serves as the Trustee for the WCERT, a U.S. Grantor Trust, established to alleviate the environmental liabilities of the Tronox, LLC. Since 2011, Weston has undertaken decommissioning and demolition (D&D) of large facilities and remediation of radiologically contaminated soil at the former Rare Earths Facility (REF), where thorium was extracted from monazite sands. Other activities comprise remediation of radiologically contaminated soil and sediments, ecological restoration of surface waters and sensitive ecosystems associated with the Kress Creek Superfund Site, and soil remediation and restoration of vicinity properties.

Weston is also developing an in situ uranium leaching technology for the treatment of source materials at the REF. With innovative and cost-effective remediation approaches and robust management and financial controls, Weston has completed all planned activities under budget every year. Weston's approach to optimize WCERT operations, address a Title X funding shortfall, and maintain schedule obligations has resulted in more than \$10M in cost savings for the Trust.

Facility Support and Security Services – DOE Sites

Since 2005, Indian Eyes, LLC (IE) has provided a broad spectrum of facility support services to DOE sites across the country, including personnel security, staffing, facility maintenance, fleet management, infrastructure upgrades, construction, and records management. IE completes the scope of work from cradle to grave. Additionally, IE has provided DOE with security support such as: security management, site and facility access control, facility clearance, personnel security access authorization, human reliability program security reviews, and visitor control.

Radioactive & Mixed Waste Management Support for Sandia National Laboratories (SNL), NM

For over 19 years, Weston has managed operations at the SNL Radioactive and Mixed Waste Management Facility for radioactive, mixed, TRU, classified, and explosive waste, and supported SNL's Stewardship and Analytical Services Department. Activities comprise radioactive and chemical characterization support; pickup, movement, packaging, and storage of waste; on-site sorting and treatment; and final off-site shipment to disposal/treatment facilities, as well as data review and management support for the sample management office.

Equipment Logistics & Fleet Management – Federal Clients

IE specializes in equipment logistic services supporting clients such as the DOE, DoD, and DHS. Operating as a single-source equipment provider, IE has built a program focused on establishing long-term business alliances with nationwide equipment vendors. IE serves as the single point of contact, eliminating time and cost required by customers to obtain equipment through multiple vendors across widespread geographical locations. IE has successfully performed projects of various magnitude simultaneously for multiple clients and offers a broad range of equipment support services for every niche of the construction, demolition, industrial, and Life Support industries.

TRU Consulting for the Los Alamos National Laboratory (LANL), NM

For 12 years, Weston has provided programmatic, technical, and QA/QC expertise to the LANL TRU program. Waste disposal activities involve assembling and documenting characterization and packaging information; reviewing hundreds of plans/procedures; and identifying radiological and hazardous constituents, as well as potential acids and oxidizers. Weston prepared acceptable knowledge process reports for chloride, nitrate, pyrochemical, metal, and Pu-238 operations at the Plutonium Facility. These reports led to final certification of TRU and eligibility for disposal at the Waste Isolation Pilot Plant (WIPP).
