

Weston Solutions, Inc.

Environmental Consulting Services

Texas Offices & Capabilities

Weston Solutions, Inc. provides environmental and infrastructure solutions that create lasting economic value for commercial and government clients worldwide by bringing facilities, land, and other resources compromised by the effects of past development back to profitable use.

In Texas, Weston has offices in Austin, Dallas, Houston, and San Antonio. From these locations, a multi-disciplined team comprising 149 engineers, geologists, construction experts, certified industrial hygienists, hazardous waste specialists, environmental scientists, information management professionals, and environmental support staff serves customers throughout the state.

Weston offers resources and experience to solve clients' most complex challenges. Our integrated services support client needs from the initial identification and definition of a problem, through planning, evaluation, and design stages, to implementation of cost-effective, technologically feasible, and politically acceptable solutions. Weston Texas offices have helped companies, communities, and government clients achieve long-term economic value for their development investments.

TRUST – PERFORMANCE – PEOPLE

Weston Provides Strategic Services in Three Key Areas

1. Assessment and Remediation

Remediation projects present unique challenges. Weston solves these challenges safely and cost-effectively, as we have for some of the most complex environmental projects in Texas. Weston has successfully designed and constructed groundwater systems and solid waste facilities; designed and installed systems that allow redevelopment during the remediation period; and completed hundreds of assessment and remediation projects under Texas Commission of Environmental Quality and the Railroad Commission of Texas rules. Weston's key areas of expertise are site assessment, remedial design, construction, treatment systems, high-hazard remediation, and advanced technology solutions.

2. Water, Wastewater, and Reuse Systems

Weston has the capabilities necessary for the planning and design of water treatment plants, high-service pump stations, and distribution systems. These capabilities include source evaluation, water quality planning, and plant renovations and upgrades utilizing cost-effective approaches. Our water and wastewater team drives stormwater planning through engineered and regulatory solutions to achieve water quality compliance. We perform this work across the United States for local, State, and Federal government agencies and private sector clients. Our projects address a multitude of requirements: from tracking sources of environmental pollution, through engineering analysis, conceptual and final design, bidding and construction phase services, Federal Emergency Management Agency Flood Insurance Map Revisions, and regulatory compliance services.

3. Environmental Management and Compliance

Operations Support

Weston Operations Support services integrate systems to successfully manage environmental issues. Permitting and Compliance Management services reduce costs and risks and enhance public image for our clients. Our services allow clients to make the best decisions about permit modifications, capital expenditures for pollution control equipment, and plant expansions. Environmental Health and Safety Program services provide needs assessment, audits, program development, and training to maintain and improve regulatory compliance. In addition, Weston has been leading the development of U.S. "Green Roof" technology and has teamed with the largest U.S. roofing supplier to implement the GreenGrid® System, a modular, rapidly installed rooftop garden application that lowers utility costs.

Environmental Information Management

Weston's Environmental Information Management services help clients record, access, transmit, and store environmental data; ensure the accuracy and continuity of data; provide a timely and cost-effective Information Technology solution that integrates hardware off-the-shelf and custom-developed software; and automate labor-intensive data entry and reporting tasks. Weston provides solutions in the areas of Mobile Data Collection Systems, Geographic Information Systems, Web-Based Applications, and Document Management.
