

# Program Management & Construction Services

## WHAT WE DELIVER:

- *Design-Build and Design-Bid-Build Construction*
- *Engineering, Procurement, and Construction (EPC)*
- *Program Management Services*
- *Construction Management Services*
- *New Construction and Facility Renovations*
- *Secure Construction and Renovation (SCIF, ICD/ICS-705, HEMP, TEMPEST, IDS, ESS)*
- *Disaster and Emergency Response Infrastructure Services*
- *Fueling System Cleaning, Inspection, Repair, Maintenance, and Design*
- *Energy Resilience Services (Microgrid Solutions, ERCIP, BESS, Renewable Energy)*
- *Electric Vehicle Charging Station Solutions (Design and Installation)*

Weston thrives where innovation meets experience, offering a comprehensive approach in program and construction management. From initial stages of preconstruction to final stages of closeout, we safely deliver high-quality renovation, repair, and new construction projects.

Our dedication to excellence in workmanship and meeting construction milestones is evident. We achieve this through clear communication, responsive service, precise estimating, stringent cost control, strict adherence to schedules, all while minimizing disruptions to our clients' daily operations.

### Delivering Success: Our Comprehensive Approach to Project Management

- **Full Lifecycle Support:** We guide our clients seamlessly through the entire project or program lifecycle, from planning and design to construction management, resource optimization, and asset management.
- **Expert Team and Network:** Combining our in-house talent and capabilities with a nationwide network of reliable local trade partners, we ensure end-to-end support for your project.
- **Minimizing Disruption, Maximizing Productivity:** We excel at working within occupied spaces, maintaining crucial operability of critical systems, and ensuring that operations continue uninterrupted.
- **Phased Approach:** By strategically synchronizing design, procurement, and construction, we expedite project schedules and get your facilities back to normal operations faster.

# PROVEN PROJECT SUCCESS:

CONFIDENTIAL

**D-B Construction Services, Secure Government Facility, CONUS, Confidential Client.** Since 2002, Weston has been providing D-B construction services at one of the United States' most secure facilities, completing \$236 million of D-B and construction with incidental design projects. Our team has executed mechanical, electrical, electromagnetic pulse, architectural, civil, communication, physical and electronic security, and utility infrastructure upgrades, as well as asbestos abatement, all while maintaining operational readiness. Weston's ongoing support of this secured facility is due to high client satisfaction, which extends across various USACE contracts, Washington Headquarters Services contract vehicles, and subcontracts with other prime contractors at the facility.

**Temporary Power Generation, Puerto Rico.** Weston provided construction, operation, and maintenance with incidental design to complete two projects with \$1.3B in value in Puerto Rico. This includes providing temporary power generation in Puerto Rico, delivering over 250 MW of power across two plants. This initiative is a critical component of the broader mission to stabilize and enhance the island's electrical infrastructure. The temporary generators are instrumental in facilitating ongoing maintenance and repairs within Puerto Rico's power system and energy grid. Moreover, they are paving the way for future upgrades aimed at fostering a more resilient and sustainable power solution.

**Construction Job Order Contracts (JOCs), Confidential Nationwide Logistics Client.** Weston currently holds four JOCs to facilitate capital improvement and repair/alteration projects at facilities throughout MA, MI, NH, NJ, PA, RI, and VT. Representative scopes include renovation/remodeling, expansion joint replacement, HVAC, electrical, plumbing, security and fire alarm systems, flooring, painting/coatings, drywall and ceilings, windows and doors, paving/stripping, signage and bollards, sidewalk replacement, concrete repair, dock lifts and levelers, fencing and gates, asphalt and paving, masonry repair/repainting, structural repairs, façade restoration, and UST/AST repairs or replacement.

**Routine Maintenance and Minor Repair (RMMR) Contract, CONUS/OCONUS, US Army Engineering and Support Center, Huntsville.** Weston is delivering a national, multi-region maintenance and repair program composed of capital infrastructure and energy projects at approximately 140 Army, Air Force and Navy locations in 31 states and 4 OCONUS sites. Our team has provided consistent program ownership for 37% of the Defense Logistic Agency's portfolio, sharing cross-region best practices that improved service performance by significantly decreasing deferred repairs. Our regional teams coordinate with the government to accomplish recurring periodic maintenance, inspection, testing, and repairs within established response times and processes to ensure our military forces remain ready and fueled to execute their mission.
