

With over 45 years of experience, Weston delivers comprehensive industrial hygiene services that prioritize health and safety across a wide range of environmental and operational contexts. Our approach is rooted in regulatory compliance, technical excellence, and a deep understanding of workplace hazards.

Protecting Health Through Precision

As regulations evolve, Weston's rapid response, scalable capacity, and decades of expertise are vital for compliance and protecting workers' health. We provide customized industrial hygiene solutions for hazards such as chemical exposure, air quality, noise, mold, and asbestos. Our services are fully aligned with regulatory standards and best practices established by OSHA, EPA, NIOSH, and ACGIH. From routine operations to emergency response, our approach is defined by technical excellence, responsiveness, and an unwavering commitment to safety.

- **Customized Solutions:** We recognize that no two workplaces are alike. Our services are tailored to your specific industry, operational processes, and risk profile—ensuring targeted, effective outcomes that exceed expectations.
- **Actionable Reporting:** Weston's reporting goes beyond compliance—clear, concise, and packed with practical recommendations that empower organizations to enhance workplace safety and confidently meet standards.
- **Experienced and Credentialed Professionals:** Weston's team includes Certified Industrial Hygienists (CIHs), Certified Safety Professionals (CSPs), Certified Hazardous Materials Managers (CHMMs), and other credentialed experts. With decades of field experience, we deliver proven strategies that enhance safety and compliance.
- **Nationwide Reach:** With a national footprint, local teams, and an extensive network of vetted specialty service providers and vendors, Weston delivers scalable services that are both consistent and responsive to your site-specific needs. This broad and reliable network enhances our capabilities and significantly extends our operational reach across the country.
- **Multidisciplinary Integration:** Our services are seamlessly integrated with Weston's environmental, engineering, and emergency response capabilities—providing you with a comprehensive, one-stop solution.
- **Proactive Health & Risk Management:** We go beyond hazard identification by providing industry specific recommendations for engineering/administrative controls and PPE to reduce long-term exposure risks, identifying and eliminating hazardous materials, and promoting employee health and wellbeing. These efforts contribute to lower turnover and healthcare costs—supporting a safer, more resilient workforce.

TECHNICAL CAPABILITIES AND EXPERTISE

We have a team of experienced field professionals and offer a comprehensive range of services, including:

Core Services:

- Threat and Hazard Identification Procedures and Protocols
- Site Remediation Services by State-Certified Professionals
- Site Evaluations and Property Due Diligence
- Permitting
- Investigation and Remediation
- Hazardous Building Material Identification & Abatement
- Indoor Air Quality Monitoring
- Noise Exposure Assessments
- Chemical Hazard Evaluations/Chemical Exposure Monitoring
- Biological Monitoring
- Ventilation System Assessments
- Environmental Sampling

Programmatic & Regulatory Support:

- **Regulatory Compliance Consulting:** Program development, audits, and training to meet federal and state regulations
- **Exposure Risk Assessments:** Evaluation of chronic and acute exposure risks and development of mitigation strategies
- **IH Program Development:** Turnkey solutions including SOPs, training, and monitoring plans
- **Permitting & Reporting:** Support for regulatory filings and documentation, including Tier II and EPCRA reporting

Environmental Compliance and IH Services for Major Transportation Authority. Since 1988, Weston has supported a New York-based transportation agency under six successive on-call environmental services contracts. Services have included environmental testing, IAQ assessments, hazardous building material surveys, and regulatory permitting support. Weston has performed lead and asbestos inspections, abatement monitoring, contaminated soil oversight, and potable water sampling across airports, tunnels, bridges, marine terminals, and transit facilities. Our team also responds to hazard complaints and provides staff augmentation for compliance support. Through daily task execution and seamless integration with client teams, Weston has helped maintain safe, compliant operations across one of the nation's most complex infrastructure networks.

On-Call Industrial Hygiene Services for a Major NYC Utility Provider. Since 1993, Weston has supported a New York City-based utility organization under an on-call environmental services contract. Weston has completed over 75 IH assignments since 2002, including personal and area air sampling, noise dosimetry, IAQ and mold assessments, and testing for asbestos, lead-based paint, and heavy metals. Projects have included confined space gas detection, asbestos-negative exposure monitoring, and VOC and particulate sampling in office, lab, and industrial settings. Weston's work has helped the client maintain regulatory compliance, protect worker health, and implement effective hearing conservation and hazard mitigation programs across a wide range of facilities.

Integrated EHS Compliance and Infrastructure Support for Industrial Operations. Weston provides comprehensive environmental, health, and safety (EHS) compliance and infrastructure support services for complex industrial facilities. Services include permitting, auditing, IH assessments, air and water quality testing, and contaminant evaluations. Weston also delivers engineering design, construction oversight, and operational support for water and wastewater systems, boiler upgrades, tank farm decommissioning, natural gas conversions, and facility decommissioning. Notably, Weston designed and permitted a fuel switch to natural gas, significantly reducing emissions and operating costs. Additional services include treatability testing, regulatory negotiations, and reporting under federal and state programs such as TRI, AER, and hazardous waste reporting—ensuring full-spectrum compliance and operational efficiency.

Multi-Year IH Program Development and Compliance Support for Utility Operations. Weston supported a large utility provider under a multi-year contract to manage occupational health risks and regulatory compliance. Services included SOP development, exposure assessments for a range of hazards (e.g., asbestos, noise, lead, mold, coal dust, silica, welding fumes) and medical surveillance guidance. Targeted lead exposure studies were also conducted. These efforts enhanced the client's health and safety programs, ensured OSHA and EPA compliance, and delivered actionable insights to protect workers and optimize operations.

Nationwide Industrial Hygiene Services for a Federal Logistics Organization.

Since 2006, Weston has delivered comprehensive IH services under multiple IDIQ contracts for a national logistics agency. Work included IAQ assessments in response to employee health concerns, fire-related air quality evaluations, and occupational noise surveys at major distribution centers. Weston also conducted lead-in-water sampling, ergonomic risk assessments, and Legionella investigations. These services involved advanced air and particulate monitoring, personal dosimetry, and EPA-compliant water testing. Through proactive hazard identification and expert-driven assessments, Weston supported regulatory compliance, improved workplace safety, and minimized operational disruptions across a wide range of facility types.

WESTON'S PRESENCE

We're the right size with the **national reach**

Act with Integrity • Live Safely • Advance Client Success
Deliver Exceptional Quality • Be Inclusive • Create a Better World; Be the Change
